4How + adjective

Answers

2How long is the Mississippi?

3How big/large is the Grand Hotel?

4How tall is Joe?

5How fast is the Greyhound Bus?

6How high is Mount McKinley?

Today's job: **READING WITH UNDERSTANDING**

1 Open your books on page 27 – The longest road in the world.

It's a very interesting text.

2 Read it and look for the unknown words in your dictionaries or in PONS dictionary on the net.

3 You can use **GOOGLE EARTH** to look for the places from the text.

4 **Do the TASK A and B and send me a picture (till Friday 8 pm).**

5 Then do the exercise on page 15 in your workbook.

ZA TISTE, KI ŽELIJO VEČ.

BACKGROUND The name of San Francisco's famous bridge is **the Golden Gate Bridge**.

The Darien Rainforest is one of the most biologically diverse regions on Earth. Plans to join up the Pan American Highway are opposed by environmental groups and indigenous people who live in the forest. They believe that the road would start a process of environmental destruction, leading to tree-felling for timber and the conversion of the forest into grazing and agricultural land. To join the missing link in the highway, there is a ferry between the cities of Colon in Panama and Cartagena in Colombia.

First answer the questions without looking anywhere, then you can check the answers on the map.

- What country does Alaska belong to?
- Is the Yukon Territory a country?
- Is the US capital on the west coast?
- What's the country south of Mexico?
- What's the country north of Colombia?
- Look at all the countries the road goes through. How many are there?

IN ŠE POMOČ TISTIM, KI NISTE TAKO SPRETNI Z ANGLEŠČINO.

Moje ime je Hank Weaver in sem voznik tovornjaka. Včasih potujem po Pan-American cesti, ki je najdaljša cesta na svetu. Pojdi z mano!

Cesta se začne na Aljaski na severu in potuje do Čila na jugu. Prečka 12 držav in je dolga 48 000 kilometrov. Speljana je mimo jezer in vulkanov, skozi sneg in puščavo, hribe in doline, džunglo in hribe.

Moj najljubši del je obala Tihega oceana v Kaliforniji. Ali veš ime znanega mosta v San Franciscu, enemu izmed največjih mest na poti.

Ko sem v Arizoni, se vedno ustavim v Highway okrepčevalnici, da nekaj pojem. Tam naredijo najboljšo jabolčno pito na svetu.

Poglejte to! Ali ni lep? To je Blue Morpho metulj, ki živi v deževnem gozdu v srednji in južni Ameriki.

Med Panamo in Kolumbijo se cesta za 100 kilometrov prekine. To področje se imenuje Darien Gap. Nekateri želijo tukaj zgraditi cesto. Veliko ljudi pa temu nasprotuje, saj je to eno izmed najbogatejših in najpomembnejših predelov z bogato rastlinsko in živalsko raznovrstnostjo.

Sedaj grem na trajekt do naslednjega dela ceste. Ne moreš zapeljati skozi vrt nekoga drugega, a ne?
